

POND CARE® DS

The Double Strength Probiotics for Pond Management

Description

Pondcare DS is a scientifically formulated blend of **latest-generation probiotics** designed to enhance pond water quality, stabilize the ecosystem, and support healthier aquaculture production. Its powerful Bio-technology breaks down organic waste, reduces toxic metabolites, and promotes a balanced pond environment.

Composition

Each gram contains: Probiotics- 44×10^9 CFU/Gm

Bacillus Subtilis, Bacillus Licheniformis, Bacillus Polymyxa, Bacillus Megaterium, Lactic Acid Bacillus, Bacillus Amyloliquefaciens.

Usages

- **Pondcare DS** produces verity of antibacterial, anti-fungal substances, which suppresses pathogenic microbes like *Salmonella, Aeromonas, E. coli* and *Vibrio* in the pond environment
- **Pondcare DS** eliminates malodorous in the pond as well as geosmin, which causes off flavor for fish/prawn
- **Pondcare DS** stabilizes pH, alkalinity and algal blooms
- **Pondcare DS** is effective in high range of salinity & pH
- **Pondcare DS** acts as a feed supplement by promoting the growth of healthy phyto/zoo plankton
- **Pondcare DS** oxidizes ammonia to form nitrites and nitrates, enhances the natural nitrification and denitrification cycles, to convert nitrate in to nitric oxide

Dosage & Administration

For Shrimp

75-150g/acre for 3-4 feet water depth

For Fish

25-50g/acre for 3-4 feet water depth

Direction of Use

Mix the required quantity of **Pondcare DS** thoroughly with 10–20 liters of pond water and molasses or sugar. Allow the mixture to activate for 30 minutes, then apply evenly throughout the pond for best results.

Or, as direction by aqua consultant.

Precaution

Don't mix with any kind of antibiotic or disinfectant. Store in a cool and dry place, away from light. Keep out of the reach of children.

Supply

50g (25×2)

For Aquaculture Use Only
