

Hepatonic **PLUS**

THE NEXT-GEN LIVER TONIC

DESCRIPTION

Hepatonic Plus is the next generation liver support formula designed with a synergistic blend of rumen bypass methionine as methyl donors, hepatoprotective agents, antioxidants, and metabolic enhancers for poultry and ruminants. It prevents fatty liver, promotes detoxification, and enhances productivity in poultry and ruminants. **Hepatonic Plus** not only protects the liver but also improves feed conversion, growth, and overall production performance.

COMPOSITION

Each liter solution contains-

Methionine Hydroxy Analogue	50 g
Tricholine Citrate	100 g
L-Carnitine HCl	35 g
Cynarine	5 g
Betaine	15 g
Sorbitol	250 g
Vitamin B3 (Niacin)	100 mg
Sodium Chloride	20 g
Magnesium	10 g

MODE OF ACTION

Methionine Hydroxy Analogue (MHA)- Methyl donor, prevents hepatic fat accumulation, supports detoxification

Tricholine Citrate - Improves bile secretion, mobilizes fat, prevents fatty liver

L-Carnitine HCl - Transports fatty acids into mitochondria for energy, reduces hepatic fat

Cynarine (Artichoke extract) – Hepatoprotective, stimulates bile flow, antioxidant

Betaine - Protects hepatocytes, prevents fatty liver, aids detox

Sorbitol - Enhances bile flow, supports digestion and detox

Vitamin B3 (Niacin) - Improves energy metabolism, regulates lipid oxidation

Sodium chloride & Magnesium - Maintain enzymatic activity, electrolyte balance, and antioxidant defense

USAGE

- Helps to repair liver tissue that has been damaged by deworming drugs and by the overuse of antibiotics.
- Protects the liver from the harmful effects of toxins- including mycotoxins.
- Helps in preventing the fatty liver disease and reduces excess fat around the abdomen.
- Repairs liver damage caused by liver fluke (parasite-related liver disease).
- Increases milk, meat, and egg production by improving the overall liver function.

DOSAGE AND ADMINISTRATION

Chickens, ducks, and pet birds

1ml/ 1–2 liters of drinking water

Cattle, goats, sheep, and horses

1–2 ml/ 10 kg of body weight

Or, as per directed by a registered veterinarian or consultant.

STORAGE

Do not store above 25° C temperature. Keep away from light and wet place. Keep out of reach of children.

PACK SIZE

100mL, 500mL

Animal/Poultry Feed Premix
