

Diacerein and Glucosamine Sulfate Film Coated Tablet

DESCRIPTION

Osticare® is the combination of Diacerein and Glucosamine Sulfate. Diacerein is an anti inflammatory agent and Glucosamine is an amino- monosaccharide. The combination used to treat osteoarthritis, rheumatoid arthritis and bone and joint pain. Diacerein has analgesic and anti inflammatory activity. It inhibits interleukin-1 synthesis and reduces finger joint and knee osteoarthritis. Glucosamine stimulates formation of collagen which is the protein portion of bone joints. Collagen is the main component of the shock absorbing cushion i.e articular cartilage.
